I. BLOKK

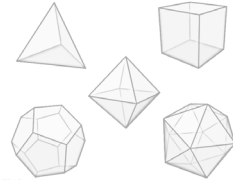

II. BLOKK

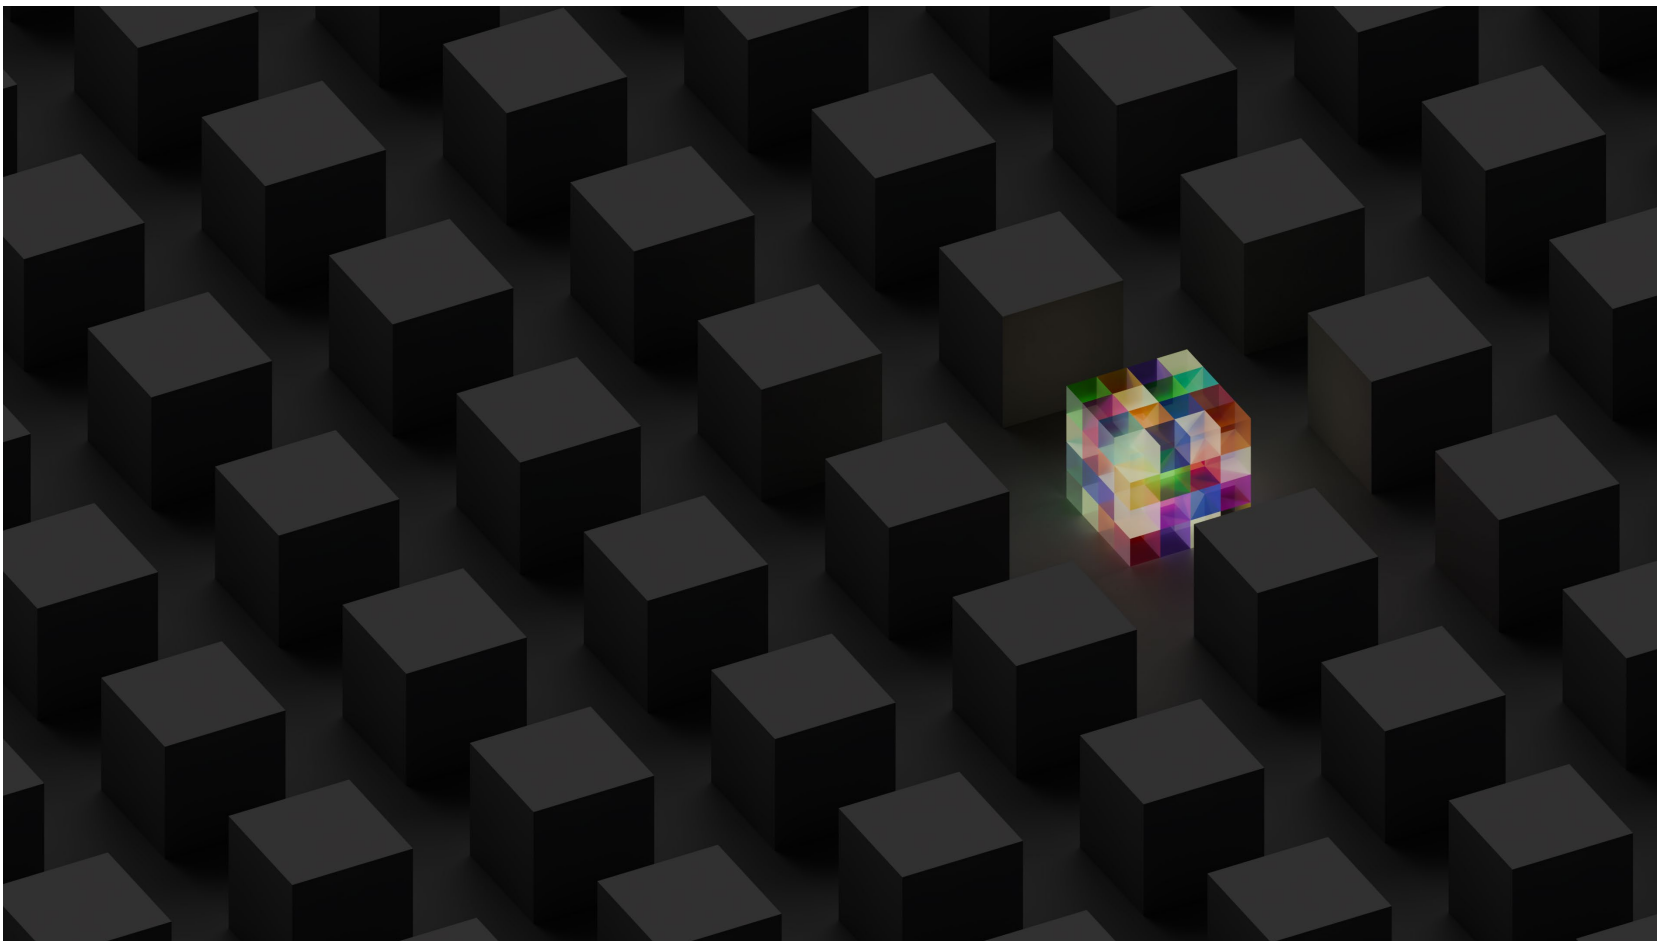

Amikor megszületett a Rajzi Tanszék,
a **kockát** bezárták – nem kérdezték.
Vetítették, forgatták, mérték,
árnyék lett belőle, nem lény, csak **emlék**.

De egy éjjel a grafit résein át
fény szivárgott: széttörte rácsát.
Kilépett a **síkból**, a **térbe** futott,
ahol testvérei vártak, a platóni alapok.

Most együtt forognak, mint hajdani rend,
s ha a rajzterem csendjébe fülelsz, idebent –
hallhatod néha, mikor a grafit sercen:
a **kocka** újra lélegzik a **szabad** térben.

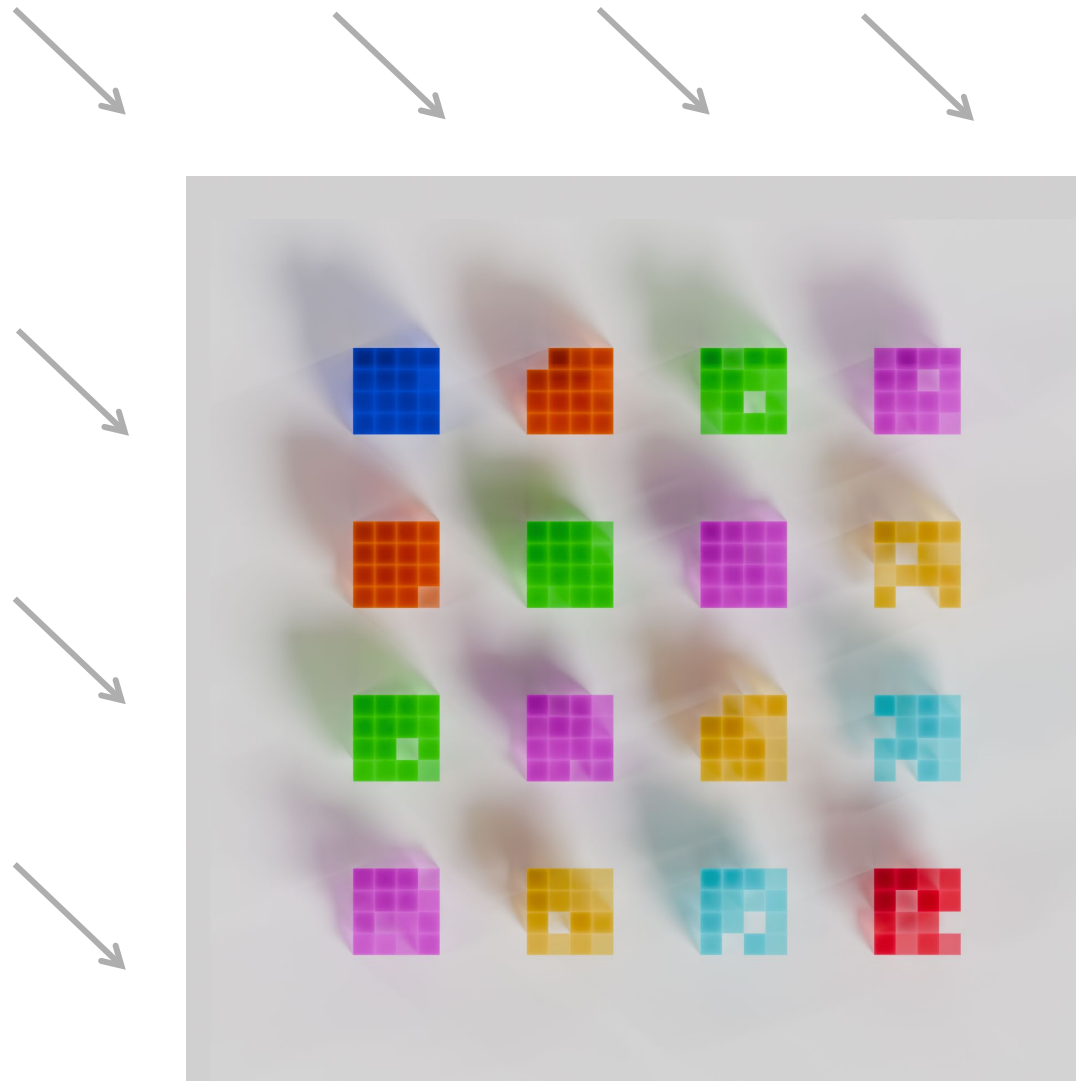

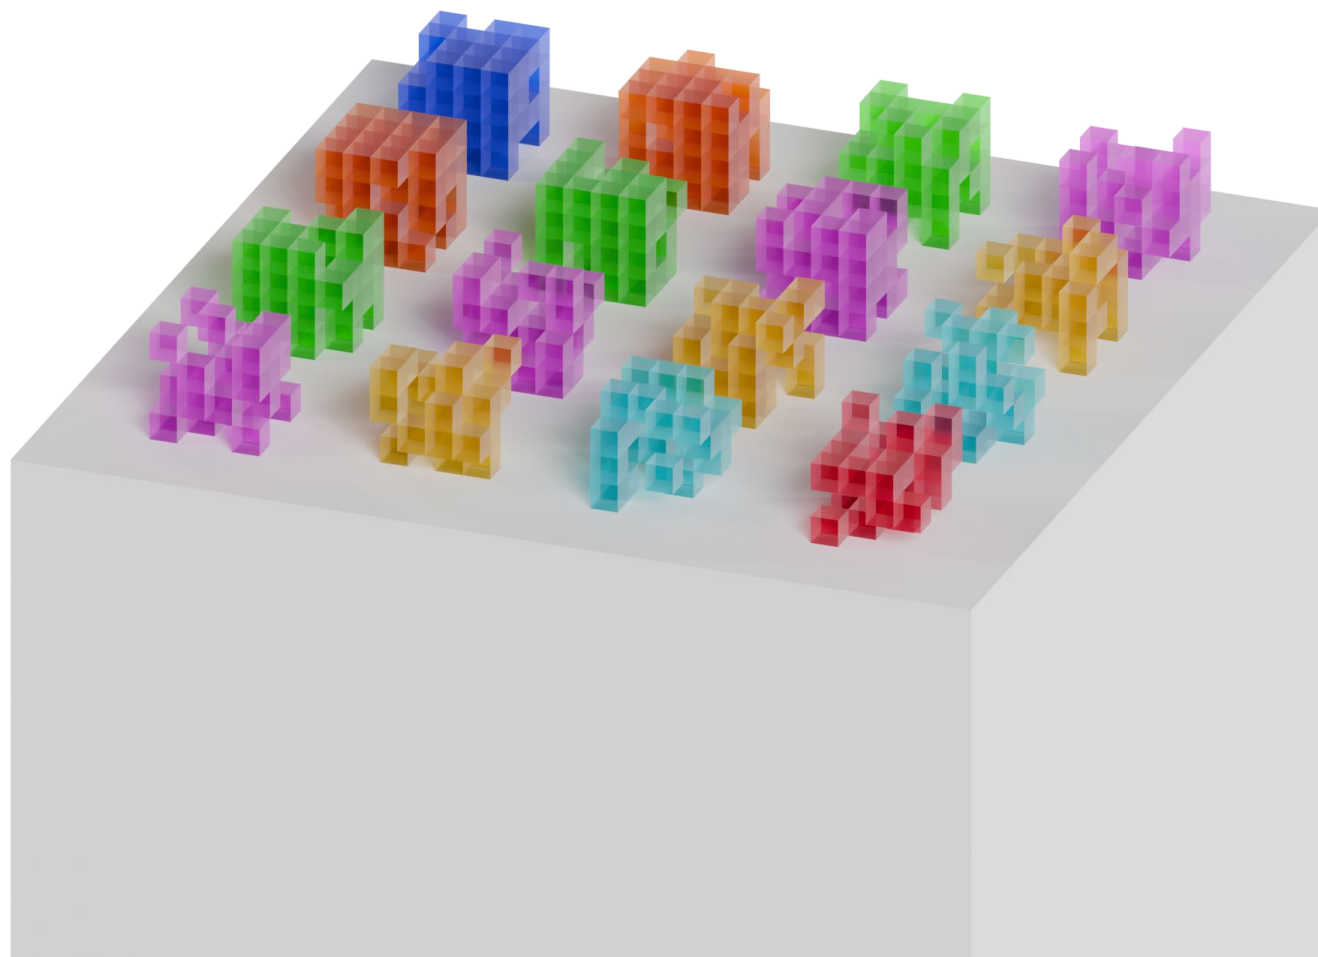

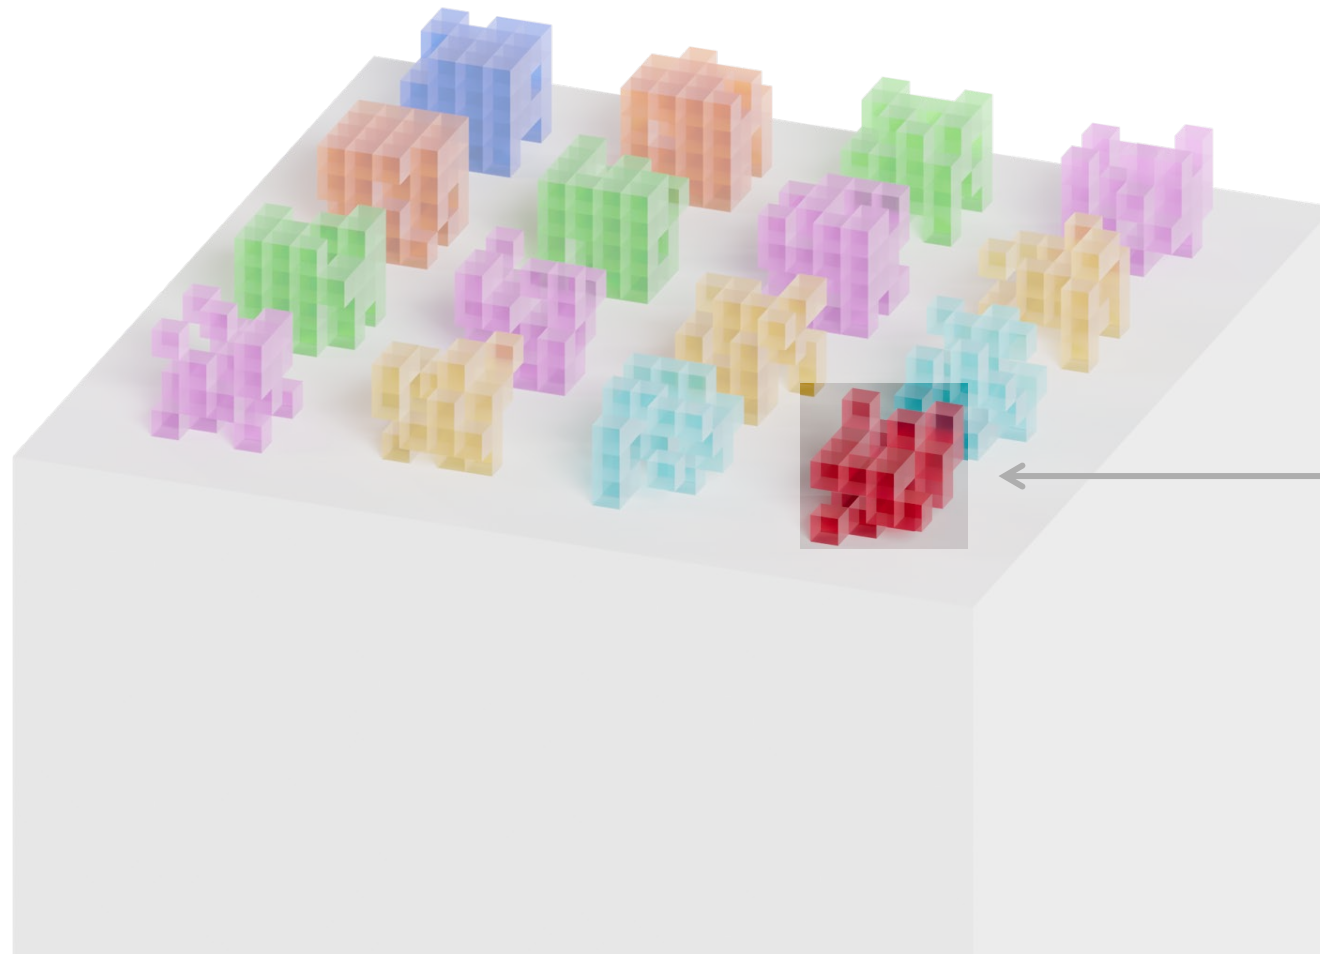

SZABADSÁGI FOK

nyilak irányával
megegyezően nő
[0 ... 1]

A 4x4x4-es alapkocka
tér raszterben, az
egységkockák az adott
szabadság fok
függvényében
szabadon
választhatták ki
helyüket és
hagyhatták el a
mátrixot.

III. BLOKK

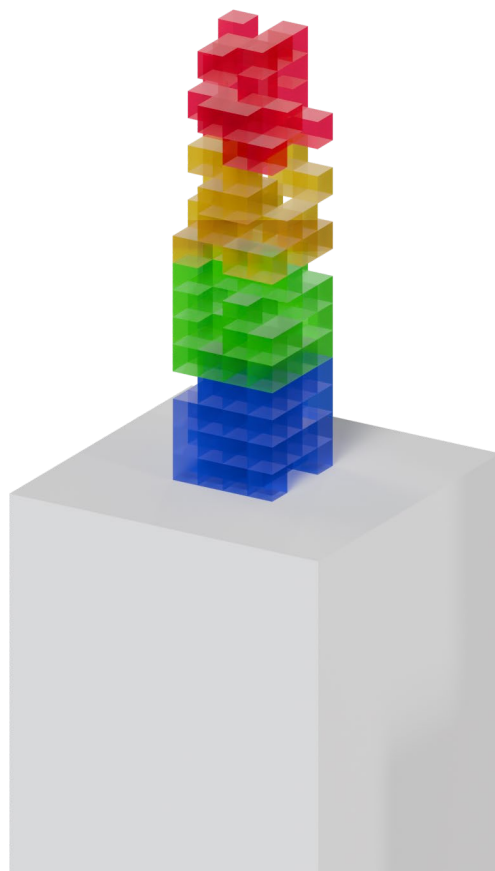

IRÁNY AZ ÉGI!

A 2. blokkban már ismerttetett elven felépült mátrixokból kiválasztottam 4-et, torony kísérleteim építőelemeként ezek szolgáltak.

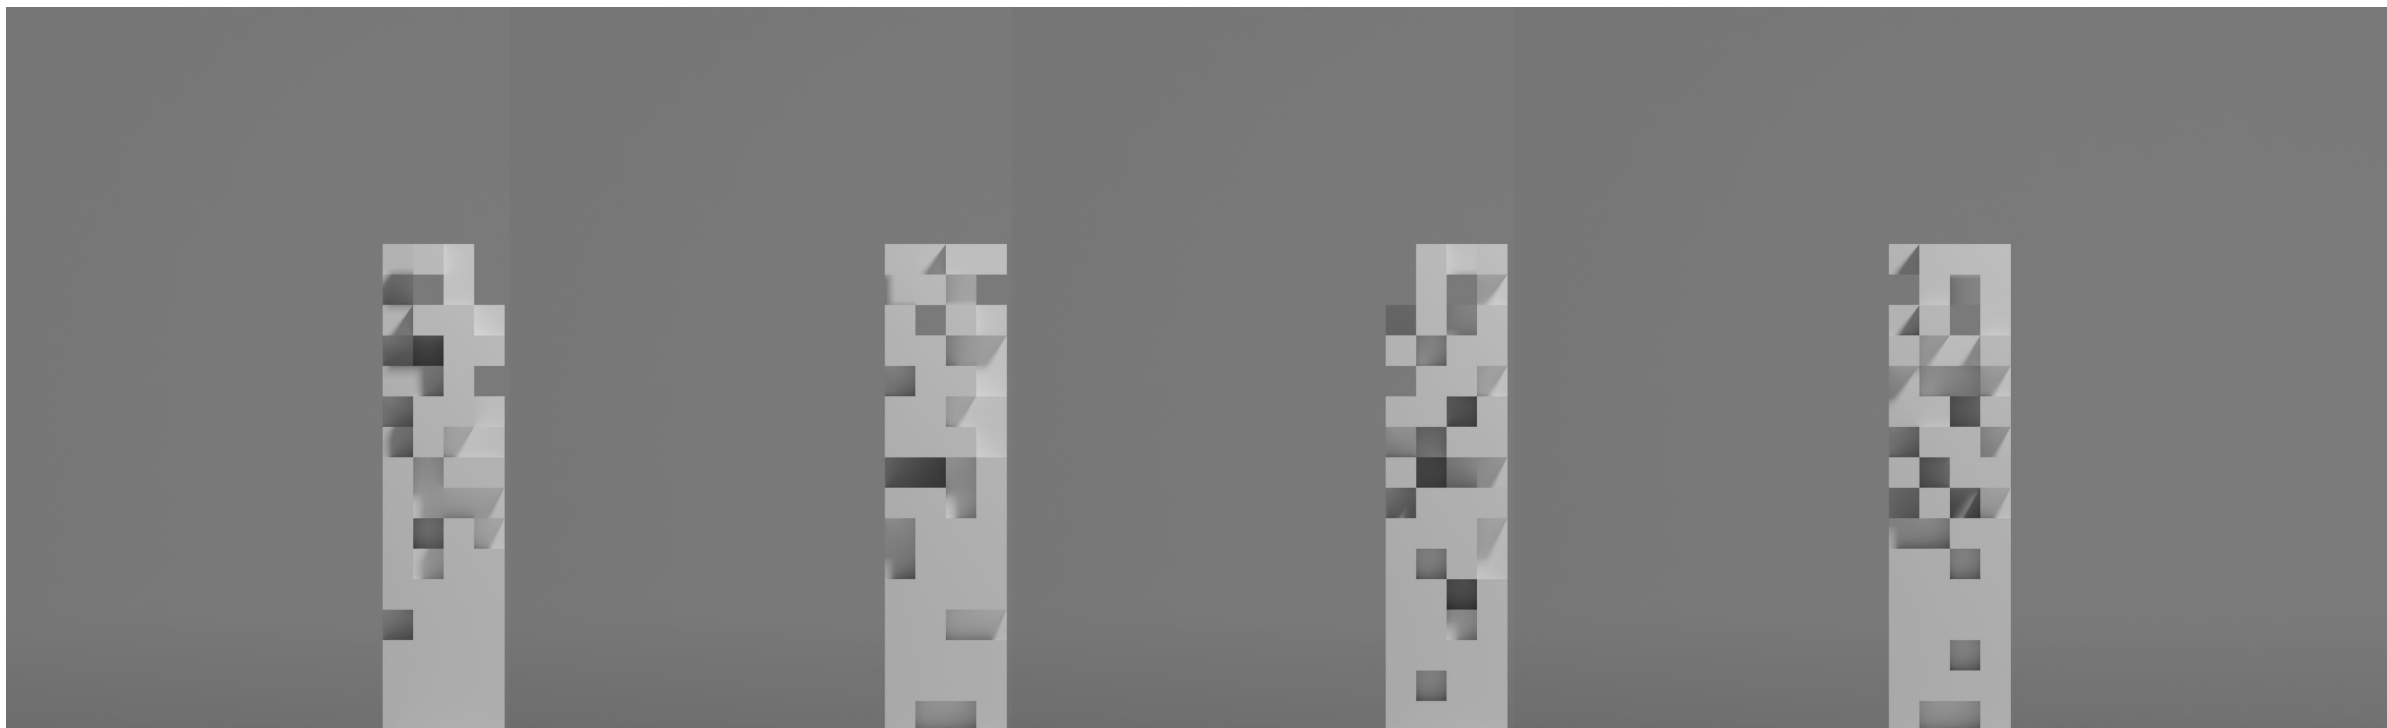

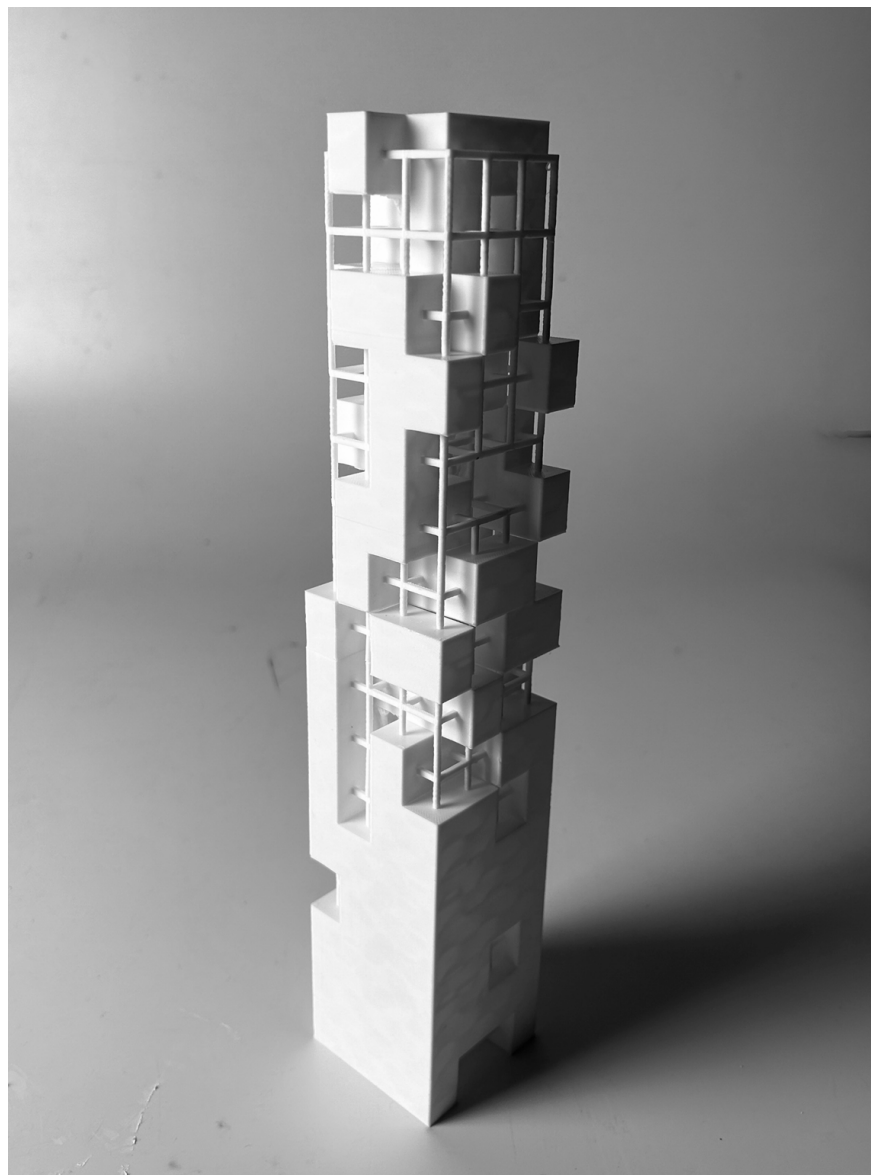

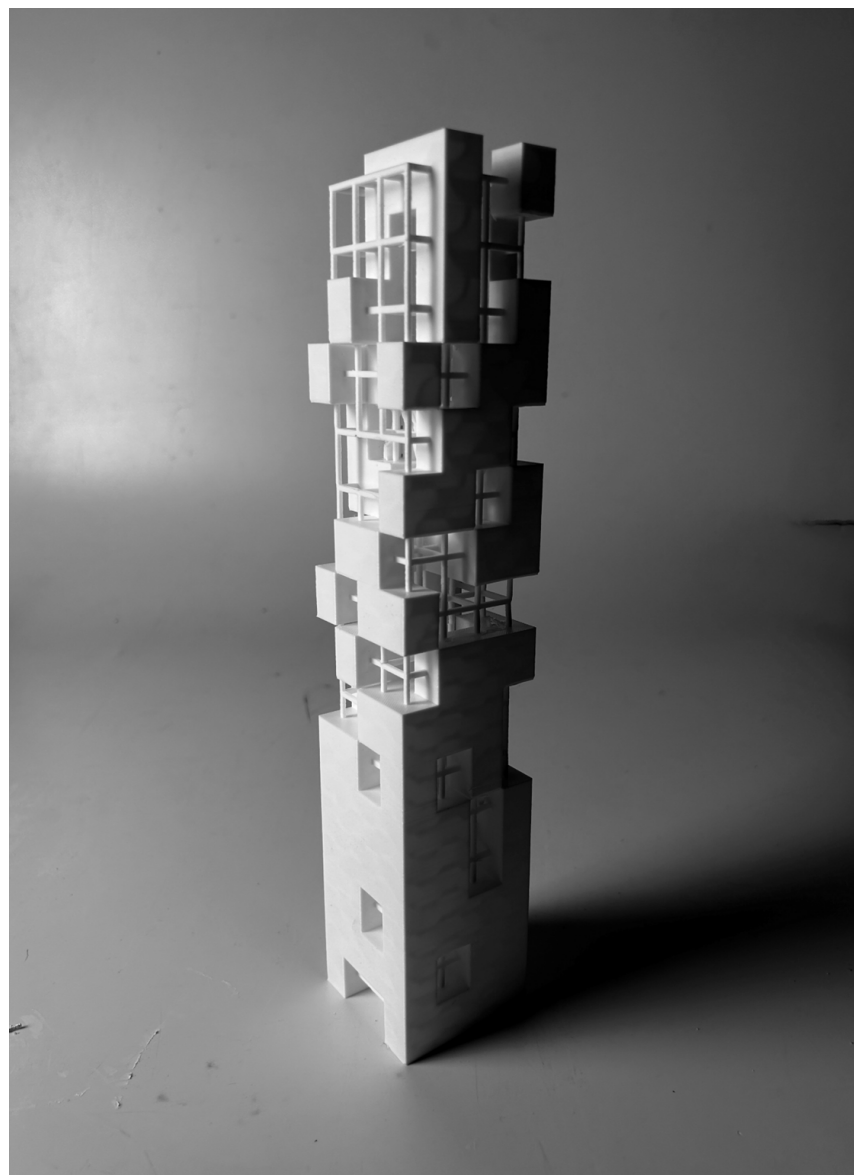

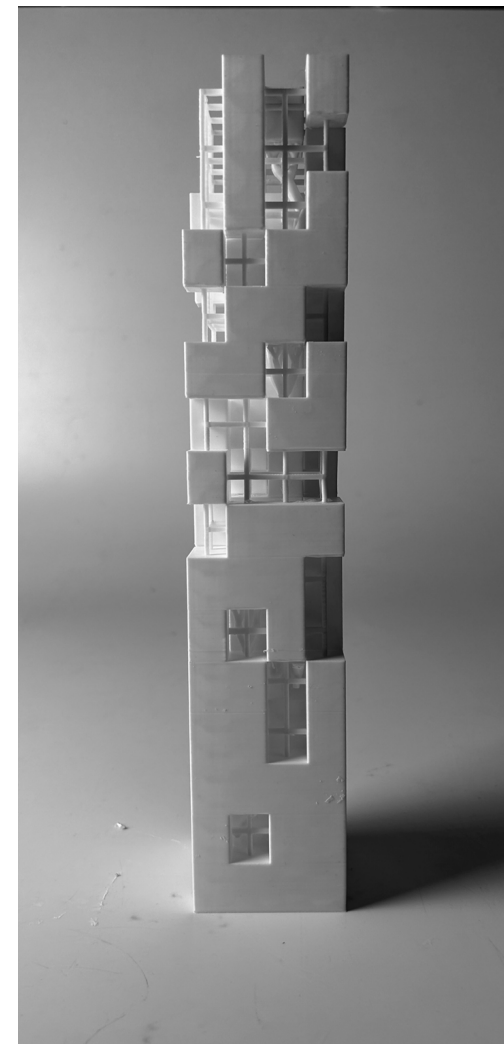

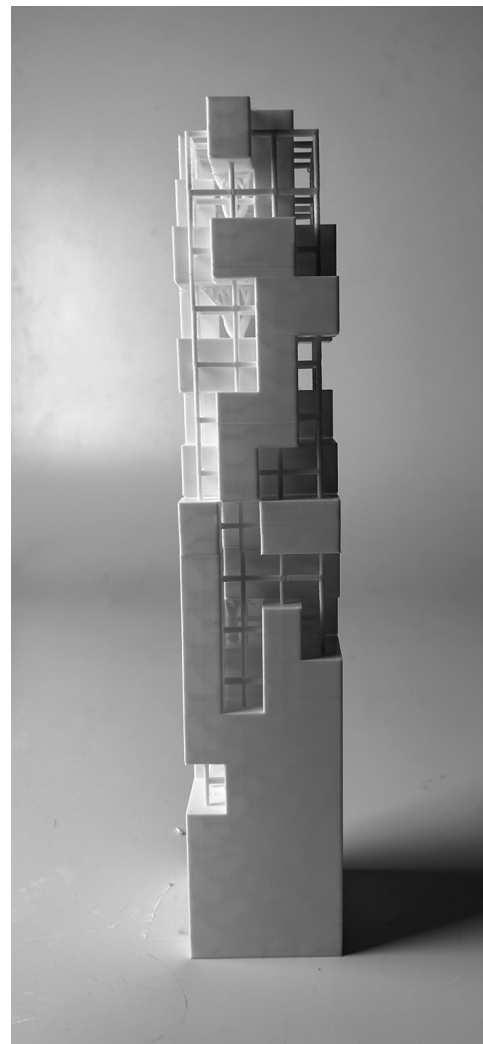

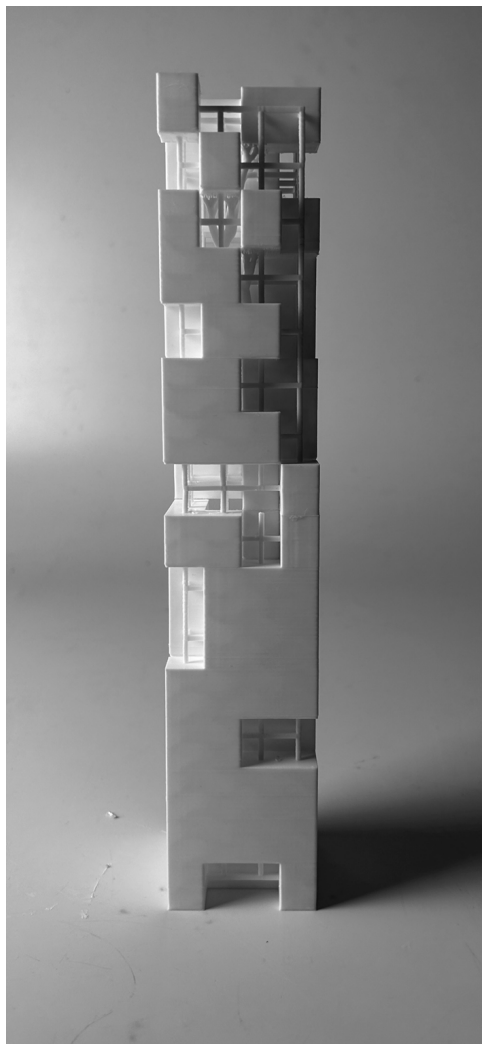

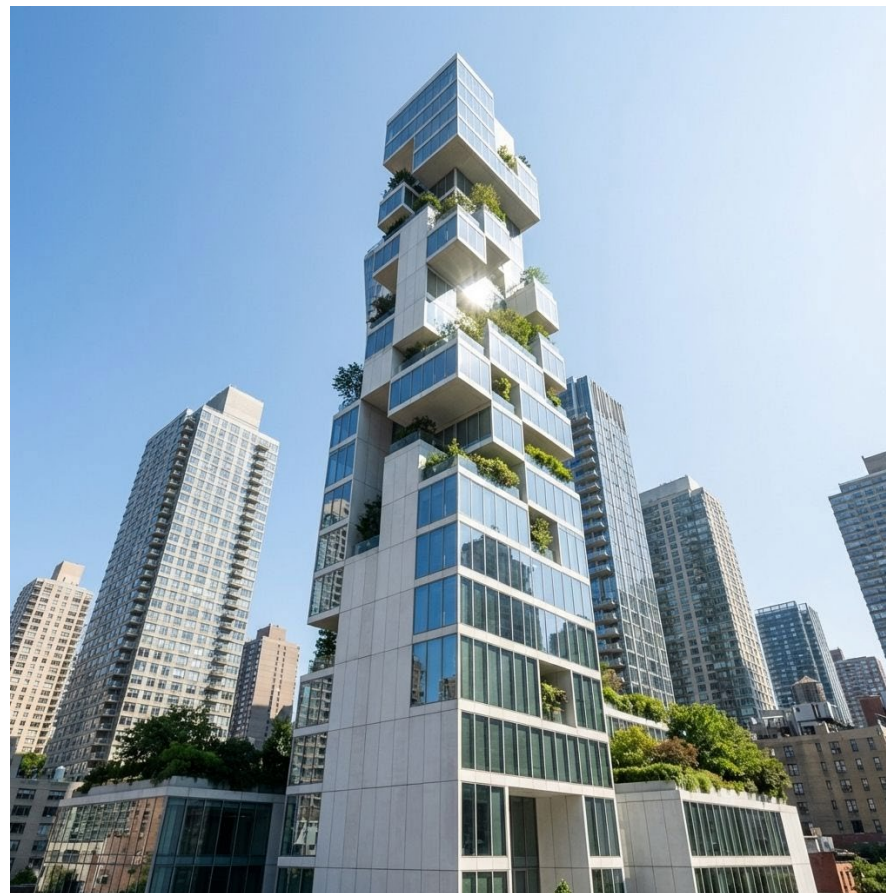

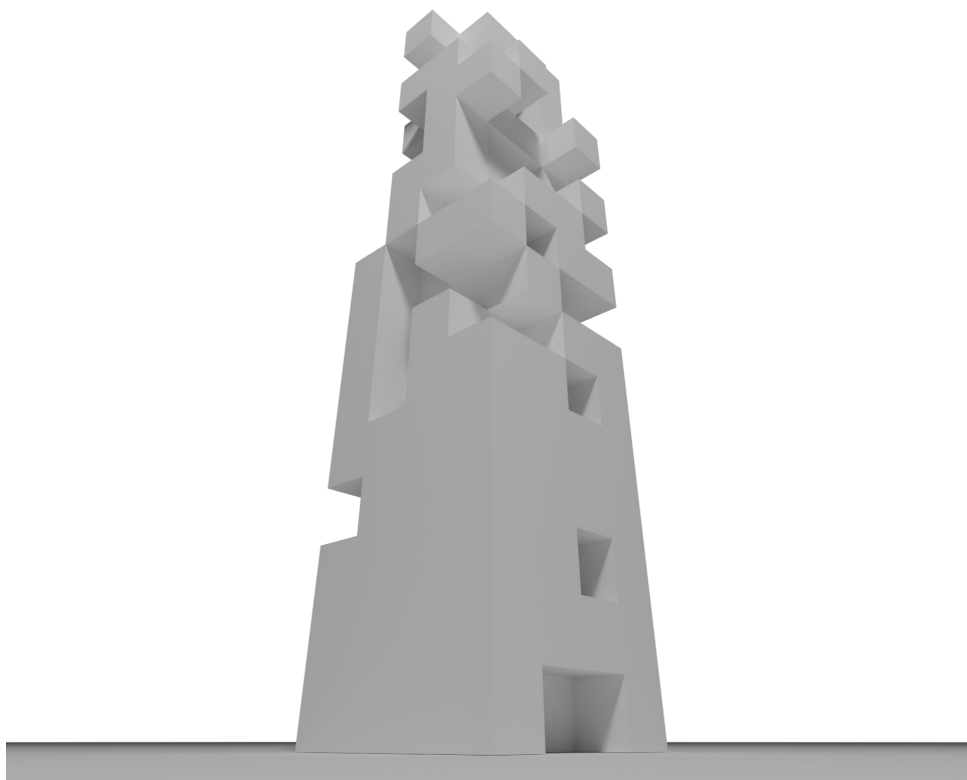

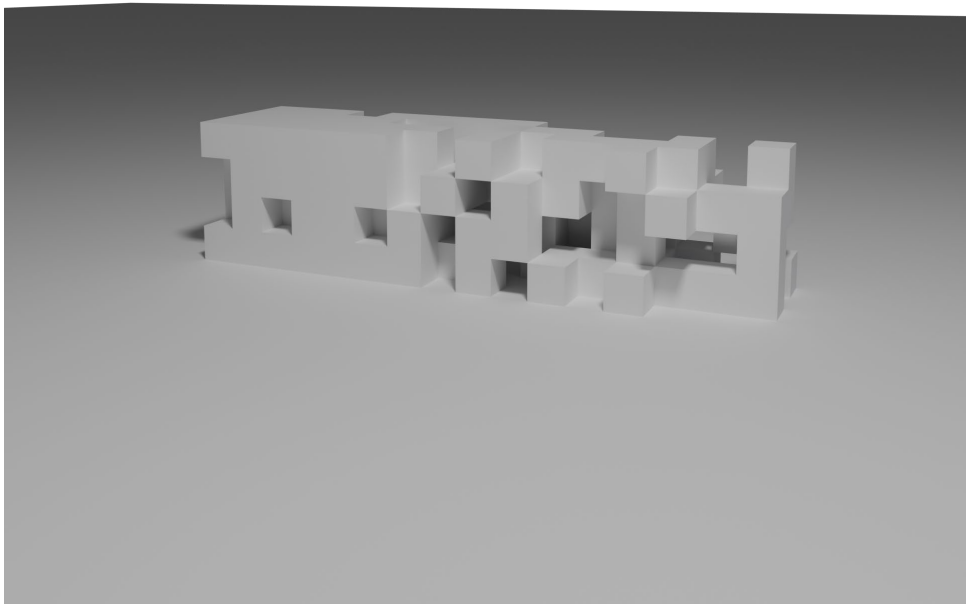

MAKETT

A modellt
arányosítottam egy
6x6x32 cm magas
hasábra, majd azt ki
3D nyomtattam, ami
csak egy rácsostartó
segítségével jöhetett
létre
